Project One Meeting Notes – 4/4/2021

In Attendance: Lisa, Joey, Yihsien, Scott

1. Project APIs: Still to be determined – do we have to use two different sources for the APIs or can we use one source for both APIs? Will ask Christian and Leah.

2. PowerPoint or other slides in addition to application and README - Google slides chosen for presentation to allow for better collaboration.

3. css Framework to Use (not Bootstrap) – Tailwind, Materialize, Bulma, others? To be determined. Will research and decide; may use more than one?

4. Setting up Project Repository – whose to use? Scott will create and share.

5. How do we divide up the work? At a high level, work can be divided up by different components: HTML/css, Google Slides, wireframe, JavaScript, README

6. Scope Management – discuss as we go through the week.

7. Communication after class? Slack, Email? Slack!
